## Who we are.

Tungsten carbide reclamation is our specialty

Extractcore specialize in buying and recycling road construction teeth, down hole drilling bits, mining/rock milling teeth and many other wear parts. We're global buyers, processors and experts on tungsten carbide. Recycling with Extractcore is an environmentally friendly process. We help you safely dispose of and recycle your scrap tungsten carbide tools and materials. Let Extractcore maximize the value left in your wear parts.

## Why you should choose Extractcore?

World class leader in carbide reclamation

**To maximize your recycling value.** Not only do we make it easy for you to recycle with us, we can pay you top dollar. Extractcore offers competitive prices for your tungsten carbide scrap. As one of the most efficient buyers of tungsten carbide in the world, there is no material or quantity that we can't handle.

**Fast, easy payment.** We let you choose your payment method: wire, ACH, check, cashier check, direct deposit, Visa card.

**Efficient Transporations.** Not sure how you'll get your material to us? We coordinate all the logistics of shipping and handling and removal! If you've got a question for us about our containers that we provide to make shipment easy, email us at team@extractcore.com

**We're helping the environment.** Our goal is to remain as green as possible in our shipping and processing of tungsten carbide, so we can continue to recycle materials for the future.
